

10 min programming challenge!

Use Python in Minecraft! 

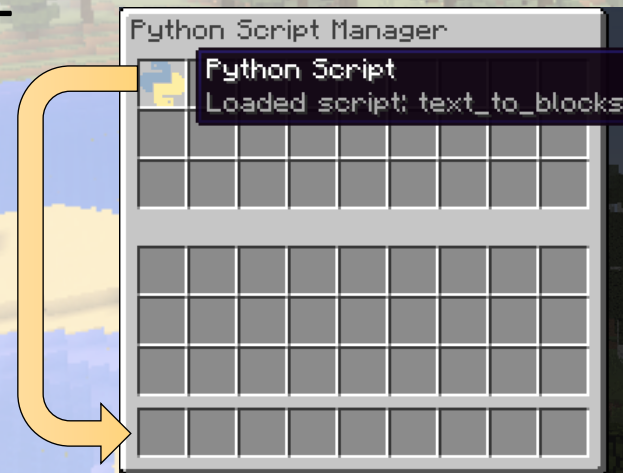

How many programming tasks can you complete in 10 minutes?

TASK 1

1. Find and right-click the computer block

2. Drag the yellow and blue item called “helloworld” to your inventory: this is called a SCRIPT

3. Close the computer by pressing **E**
4. Right-click with the script in your hand, what happens?

5. Next, we'll look at the script itself, first pause the game by pressing **Esc**

6. Now look on the right hand side of your screen and double-click the file called **helloworld.py**

7. Find the line that says **mc.postToChat("Hello World!")**

8. Change the word “**World**” to your name and then save the file

9. Repeat steps 1, 2, 3, and 4. What changed?
