Python with Minecraft

10 Minute Programming Challenge!
Try to complete as many of the programming tasks in 10 minutes…

Task 1

1. Find and right-click the computer block, then get the yellow and blue item called "hellominecraft", this is called a script

2. Right-click with the script in your hand

3. Next we'll look at the script itself, look on the right hand side of your screen

4. Open the file called "hellominecraft.py"

5. Fine the line that says "mc.post_to_chat("Hello World!")

6. Change the word "World" to your name

7. Repeat the 1st and second steps, what changed?
